ASSESSMENT TOOL 2 – SCENARIO BASED ASSESSMENT

Course Code:	CSA0621	Course Title:	Design and Analysis of Algorithms
CO Assessed:	CO2 – Manipulation (BL1, BL2, BL3)	Assessment:	Assessment Tool 2 – Scenario Based Assessment
Weightage:	20% of CIA	Total Marks:	100
CO2 Statement:	<i>Apply Brute Force technique to solve sorting, searching, Closest-Pair and Convex-Hull problems (BL1, BL2, BL3)</i>		
Student Name:	V.Lasya	Reg. No.:	192524186
Section / Batch:	B.Tech AI&DS	Date:	31-07-2026

Instructions to Students

- Answer BOTH scenario-based questions. Each question carries 50 Marks. Total: 100 Marks.
- Carefully analyze the given scenario and identify the computational problem involved.
- Apply appropriate Brute Force techniques for sorting, searching, Closest-Pair, and Convex-Hull problems wherever applicable.
- Clearly justify the chosen solution approach with proper reasoning and analytical interpretation.
- Demonstrate decision-making skills by comparing possible solutions and selecting the most suitable approach.
- Use diagrams, stepwise illustrations, or algorithmic representations wherever necessary.
- Maintain clarity, logical organization, and proper technical presentation throughout the answers.

Question Type	Focus Area	Questions	Marks
Scenario Based Assessment	Analyze real-world scenarios and apply Brute Force techniques for sorting, searching, Closest-Pair, and Convex-Hull problems	Q1 - Q2	100 (2 × 50)
GRAND TOTAL:		100 Marks	

SECTION A – SCENARIO BASED ASSESSMENT

Language: Python C C++ Java

QUESTIONS
Q1
Brute Force
100 marks
Q2
Brute Force
100 marks
1/2 answered

Q1 Brute Force
100 marks
A banking system uses Binary Search on sorted customer IDs, but frequent insertions disturb order.a) Explain how Binary Search works.
b) Analyze the impact of unsorted data.
c) Discuss the importance of maintaining sorted datasets.
Your Code

```
1 def binary_search(arr,target):
2     low=0
3     high=len(arr)-1
4     while low<=high:
5         mid=(low+high)//2
6
7         if arr[mid]==target:
8             return mid
9         elif arr[mid]<target:
10            low=mid+1
11        else:
12            high=mid-1
13    return -1
```

Input
[181,105,110,115,120,125]
Output
customer ID found at index: 3
(a)binary search works by repeatedly dividing the sorted array into two halves until the target element is found.

Q2 Brute Force
100 marks
1/2 answered

b) Analyze its time complexity.
c) Discuss why the approach becomes inefficient for large text inputs.
Your Code

```
1 def brute_force(text,pattern):
2     n=len(text)
3     m=len(pattern)
4     for i in range(n-m+1):
5         j=0
6         while j<m and text[i+j]==pattern[j]:
7             j+=1
8         if j==m:
9             return i
10    return -1
11 # example
12 text="this is a plagiarism detection system"
13 pattern="plagiarism"
14 result=brute_force(text,pattern)
15
16 if result!=-1:
17     print("pattern found at index:",result)
18 else:
19     print("pattern is not found")
20 print("\n(a)brute force string matching compares the pattern with every
21 print("\n(best case:O(n)")
22 print("\n(worst case:O(n*m)")
23 print("\n(c)it becomes inefficient for large text inputs because every
```

Input
this is a plagiarism detection system
Output
pattern found at index: 10
(a)brute force string matching compares the pattern with every possible position in the text until a match is found or all

Signature of the Student:

**RUBRICS FOR CALCULATION**

Criteria	Wt.	Level 4 – Exemplary	Level 3 – Proficient	Level 2 – Developing	Level 1 – Beginning
Problem Understanding & Context Analysis	25	Thoroughly understands the scenario with accurate interpretation of all requirements	Clearly understands the scenario with minor gaps	Basic understanding; some aspects of the scenario unclear	Poor understanding or misinterpretation of the scenario
Application of Concepts	30	Applies appropriate concepts effectively to solve complex real-world problems	Applies relevant concepts correctly with minor errors	Applies basic concepts but with limited accuracy	Fails to apply appropriate concepts
Analytical & Decision-Making Skills	20	Demonstrates strong analysis and selects optimal solutions with justification	Good analysis with reasonable solutions	Limited analysis; solutions lack justification	Poor or no analysis; incorrect decisions
Solution Design & Approach	15	Well-structured, innovative, and feasible solution approach	Logical and structured solution with minor gaps	Basic solution with limited structure or feasibility	Unclear or incorrect solution approach
Clarity, Justification & Presentation	10	Clear, well-justified explanation with strong reasoning	Clear explanation with some justification	Limited clarity and weak justification	Poorly explained with no justification

Marks Evaluation:

Question No.	Problem Understanding & Context Analysis (25%)	Application of Concepts (30%)	Analytical & Decision-Making Skills (20%)	Solution Design & Approach (15%)	Clarity, Justification & Presentation (10%)	Total Marks (Each – 50)
